

Please consider the impact of limiting 1st amendment rights in reviewing the NAB petition 04-160. I would express my desire for the FCC and Congress to reject this petition. Any attempts to regulate public information and how it is distributed is contrary to the principles of this nation. Also, the variety and depth of material beyond basic news and weather are not accessible via any other medium at such a reasonable method. Satellite radio allows control for parents that is unprecedented in todays radio and tv mediums. Please take these comments into consideration.

Sincerely,

John LaPorte
